## 0.SYSTEM REQUIREMENTS

---

### **Minimum requirements**

#### *Operating System*

Windows 7 with Service Pack 1 (32 or 64bits)  
Windows 8 (32 or 64bits)

#### *Hardware*

RAM Memory: 2GB  
Processor: Intel© Core 2 Duo 2 GHz or similar  
Video memory: 256MB dedicated memory (not share with general RAM)  
Screen resolution: 1366 x 768  
At least 300MB free hard disk space to install software

### **Recommended requirements**

#### *Operating System*

Windows 7 with Service Pack 1 (32 or 64bits)  
Windows 8 (32 or 64bits)

#### *Hardware*

RAM Memory: 4GB  
Processor: Intel © Core i7 or equivalent  
Video memory: 512MB dedicated memory (not share with general RAM)  
Screen resolution: 1920 x 1080  
At least 300MB free hard disk space to install software

### **Minimum requirements necessary to...**

#### **Capture and register actions in real time**

##### *Using video cameras via FireWire:*

1x FireWire port (IEEE1394) or 1x PCMCIA (Expresscard) free Slot to add external FireWire Port

##### *Using hard disk video camera and USB Digitizer (e.g. Hauppauge USB Live-2):*

1x USB2 or USB3 port

##### *Overhead projector or secondary monitor*

1x HDMI (recommended) port or 1x VGA port

##### *Video storage*

Computer hard disk or external hard drive USB2 or USB3 can be used to store videos.

# 1. KEYBOARD SHORTCUTS

---

<a href="#">1.1 Video player</a>	Page 5
<a href="#">1.2 Timeline</a>	Page 5
<a href="#">1.3 Category template</a>	Page 6
<a href="#">1.4 General</a>	Page 6

## **1.1 Video player**

**M:** Advance frame by frame. Press once to advance just one frame.

**N:** Rewind frame by frame. Press once to rewind just one frame.

**B:** Fast forward up to 3X speed. Press once to cycle through speeds.

**V:** Rewind up to 3X speed. Press once to cycle through speeds.

**Left/right arrow keys:** Short jump through video with configurable time.

**Up/down arrow keys:** Medium jump through video with configurable time.

**Shift + left/right arrow keys:** Long jump through video with configurable time.

**Spacebar:** Play/pause video.

**Shift + Enter:** Full screen video playback.

**Esc:** Exit full screen mode. To switch between full screen and previous video play size, double click on the title bar of the respective window.

**L:** Continue the video after playing a register.

**Note:** You can also see the video player short cuts while registering in the options icon on the video player.

## **1.2 Timeline**

**1:** Play next register (action) in the selected register.

**2:** Play previous register (action) in the selected register.

**3:** Add selected register to a selected list from the presentation.

**Insert:** Add a selected register to the selected list from a presentation.

**C:** Create register in a selected category.

**Del:** Delete selected register/s.

**A:** Go to the following category.

**Q:** Go to the previous category

**Control+T:** Hide/ show Timeline

**Note:** whilst the Timeline is hidden, registers can be only viewed by categories and not in chronological order.

## **1.3 Category template**

**Click + drag:** Move selected buttons

**Alt + click + drag the bottom-right corner of a button:** Change size of a button.

**Hold Ctrl + click:** Select multiple buttons individually.

**Click on the background and drag:** select multiple buttons at once

**Control+Z :** Undo changes.

**Double click:** Create a button which behaves as a category

**Ctrl + double click:** create a button which behaves as a descriptor

## **1.4 General shortcuts**

**Shift + P:** Show all opened windows. In the case you close **Nacsport Basic** with one or several windows on a secondary monitor or projector, those windows will not be shown if you open the program again without connecting the secondary monitor or projector. This combination of keys fixes this problem.

**I:** Sets the START for the selected register to the current video position. (Timeline and presentations)

**O:** Sets the END for the selected register to the current video position. (Timeline and presentations)

## 2. QUICK GUIDE

---

<a href="#">2.1. Real-Time register</a>	Page 8
<a href="#">2.2 Viewing and recording from file</a>	Page 12
<a href="#">2.3 My analysis</a>	Page 15

## **2.1. Real-Time register**

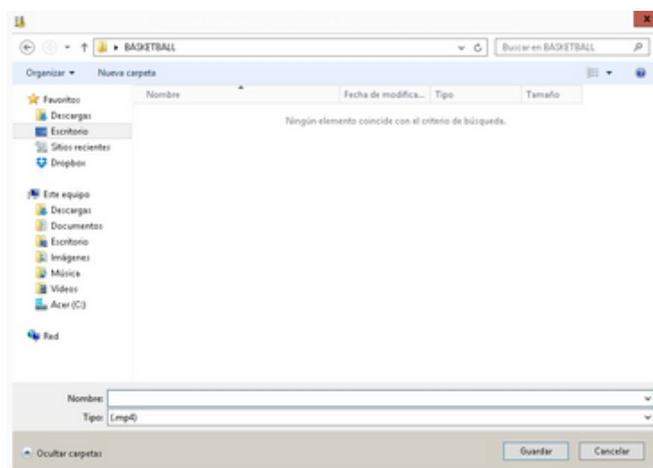

Real-Time register is the environment where videos can be viewed from an external source (video camera, video converter, etc.) connected to the FireWire port of the computer. While a video file is being created (digitized) with external images, user can use a category template to register actions.

In other words, both video and actions register are created simultaneously. At the end of the event, user will have all the actions in a Timeline, where they can be easily analysed and managed.

**1.- Click on 'Real-Time Register' on the main menu.**

**2.- Enter the name of the video file to be captured. Then click on 'Save'.**

**3.- The video will be in .MP4 format and compressed quality.**

#### 4.- Open or create a category template to record the actions of the generated video.

To create a category template, click on .

To open a category template, click on .

#### 4.1 categories

If you have selected 'Create new category template', users should insert the desired categories (buttons) by typing the name on the **New Name box** by clicking .

Template example:

5.- To start the video capture, click .

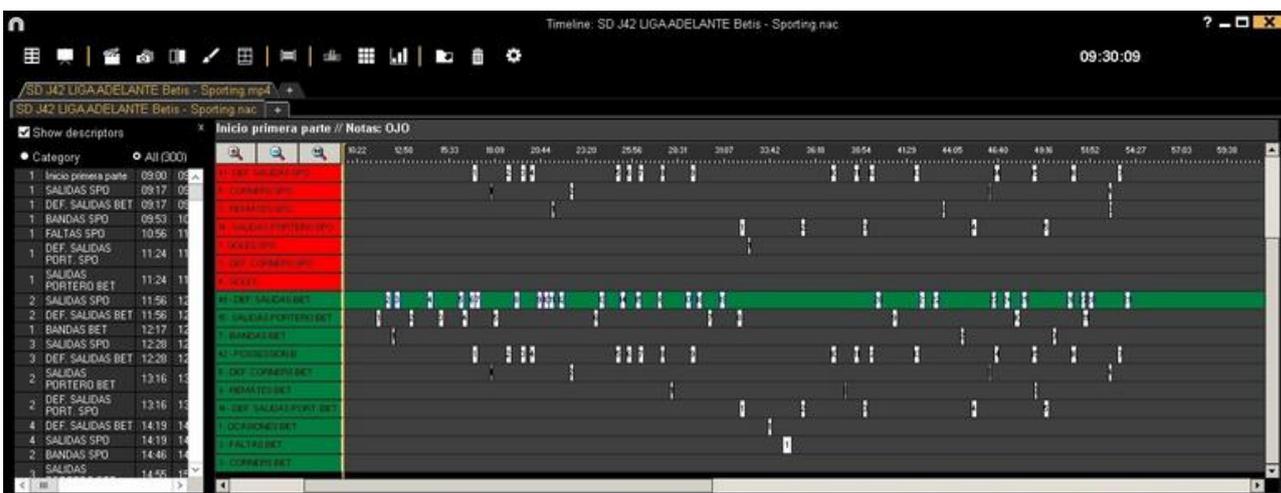

Then click the categories (buttons) created for that purpose as they arise.

To pause, click .

In order to play, compare, classify or change the recorded actions, click  to open the record editing environment (Timeline).

6.- This environment contains all the recorded actions which are shown by categories (rows) in an intuitive Timeline.

These are all the available **Timeline options**:

- **Zoom** : To maximise or minimise the Timeline. To show the entire Timeline, click .
- **Change the start or end of a record**: Place cursor on the left (start) or right (end) of the record and when it changes to , then left click and drag it in one of the two possible directions.
- **Temporary displacement of record** (without affecting its length): Place cursor in the middle of the record and when it changes to , then left click and drag it in one of the two possible directions.
- **Add category** (row): Right click on the name of a category (row) and select **Add row**. Then enter a name and click **Ok**. Timeline would have a maximum of 50 categories or rows (depending on the number of categories previously created in the buttons template)
- **Edit category name** (row): Right click on the name of the category to be edited, select **Edit category name** and click .
- **Delete category** (row): Right click on the name of the category to be deleted, select **Delete row** and click on **Yes**.
- **Duplicate category** (row): Right-click on the name of the category to be duplicated and select **Duplicate row**.
- **Timeline's tools**: See section 5.2

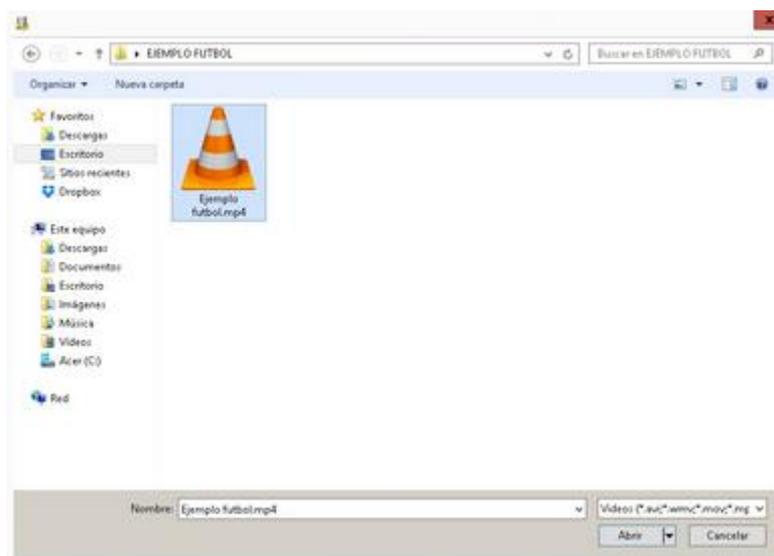

## 2.2 Viewing and recording from file

This is the environment where a video file can be seen and actions are recorded in the category template created by the user.

**1.- Click on Register from File on main menu.**

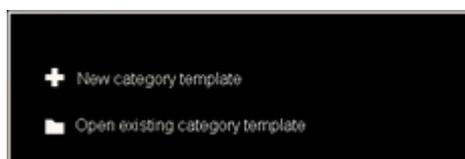

**2.- Select the video file you wish to watch and click Open.**

**3.- Open or create a category template to record the actions of the generated video**

To create a category template, click .

To open a category template, click .

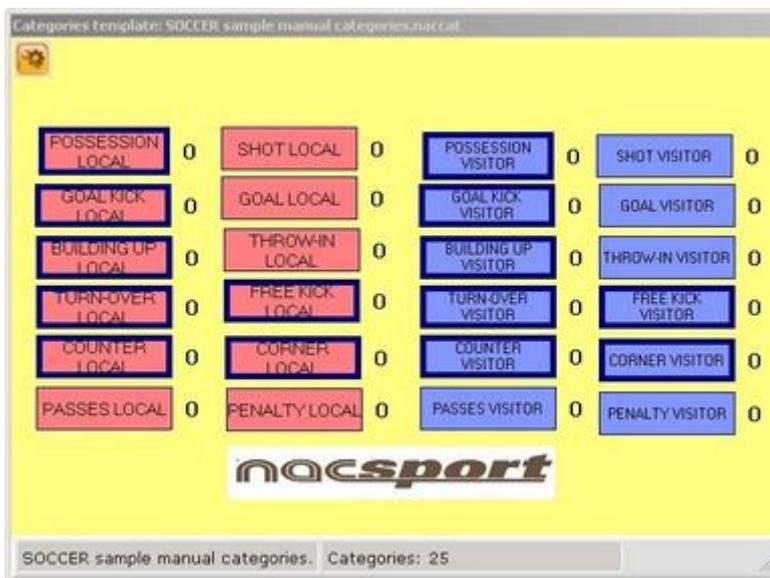

### 3.1 categories

If you have selected **Create new category template**, insert the desired categories (buttons) by typing the name on the **New Name box** clicking **+**.

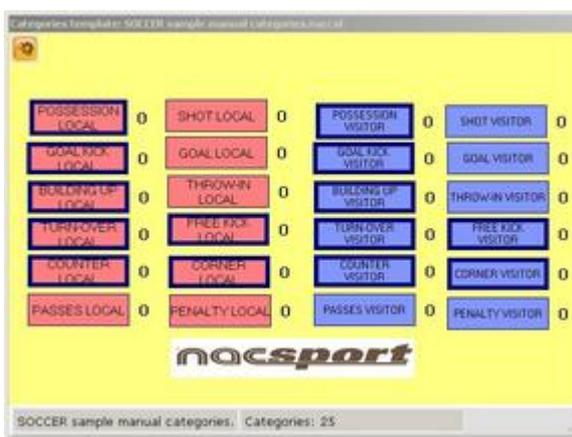

Template example:

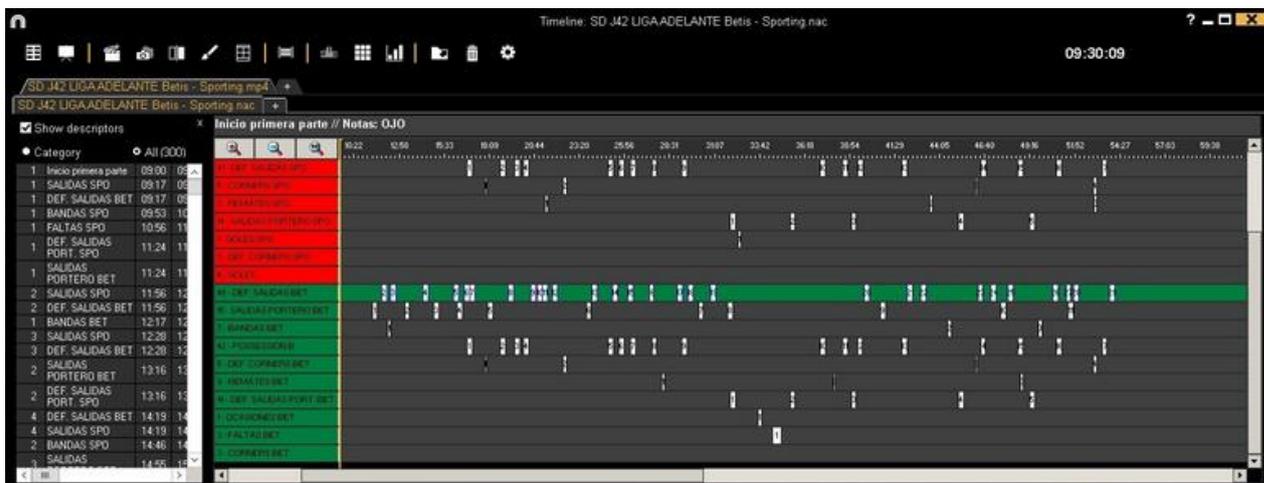

### 4.- To record actions

Click or **Record actions**, then click the video to play and finally click categories (buttons) created for that purpose, as they arise. To pause, click the video image. To play, compare, classify or change the recorded actions, click to open the record editing environment (Timeline).

**5.- This environment contains all the recorded actions which are shown by categories (rows) in an intuitive Timeline**

These are all the available **Timeline options**:

- **Zoom** : To maximise or minimise the Timeline. To show the entire Timeline, click

- **Change the start or end of a record**: Place cursor on the left (start) or right (end) of the record and when it changes to , then left click and drag it in one of the two possible directions.

- **Temporary displacement of record** (without affecting its length): Place cursor in the middle of the record and when it changes to , then left click and drag it in one of the two possible directions.

- **Add category** (row): Right click on the name of a category (row) and select **Add row**. Then enter a name and click on **Ok**. Timeline would have a maximum of 50 categories or rows (depending on the number of categories previously created in the buttons template).

- **Edit category name** (row): Right click on the name of the category to be edited, select **Edit category name** and click

- **Delete category** (row): Right click on the name of the category to be deleted, select **Delete row** and click **Yes**.

- **Duplicate category** (row): Right-click on the name of the category to be duplicated and select **Duplicate row**.

-**Timeline's tools**: See section 5.2

## 2.3 My analysis

In this environment, you can consult all the Nacsport databases created or imported by the user.

To access presentations, timeline or the viewing and record environment, double click to database (green means available) and select your preferred option.

If the database is in red, this means the associated video is in a different location than the last time it was used, it has a different name or the video has been deleted. If the video is still available, it can be associated by double clicking the red database and searching for it.

Following actions can be performed:

- **Create subfolders:** click the desired folder and then click
- **Delete folders (and the databases they contain) or databases:** click the desired folder and then click
- **Assign favourite folder:** click the desired folder and then click
- **Select folder directory:** click and select directory.

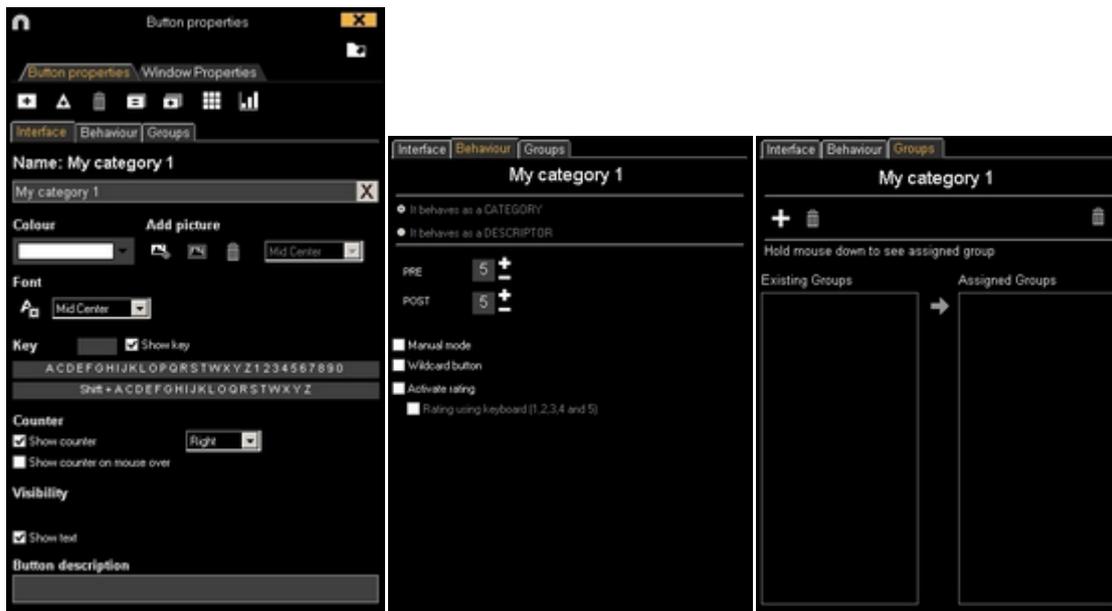

### 3. CATEGORIES TEMPLATE

---

[3.1 Categories template icons](#) Page 17

[3.2 Creating categories templates](#) Page 19

### 3.1 Categories template icons

#### A) Button properties

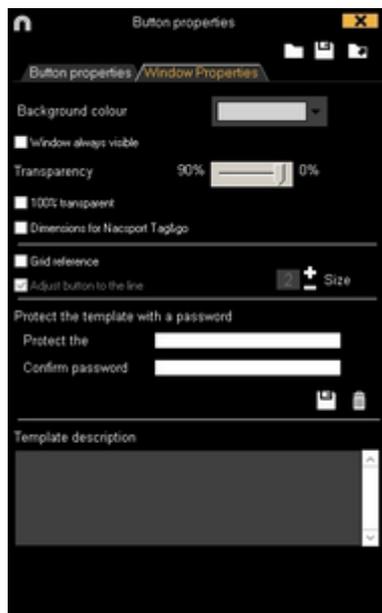

- Create a new category (button).
- Delete all categories created in actual template.
- Open window to rename and save category template.
- Add properties of the blue highlighted category to other selected categories.
- Clones selected category (button).
- Make a dashboard
- Export the template to Tag&Go
- Open an already created template

#### a) Interface

- Open the window to customize font and colour of the category.
- Open the window to add an image to a category (button).
- Fit the size of the image to the size of the category.

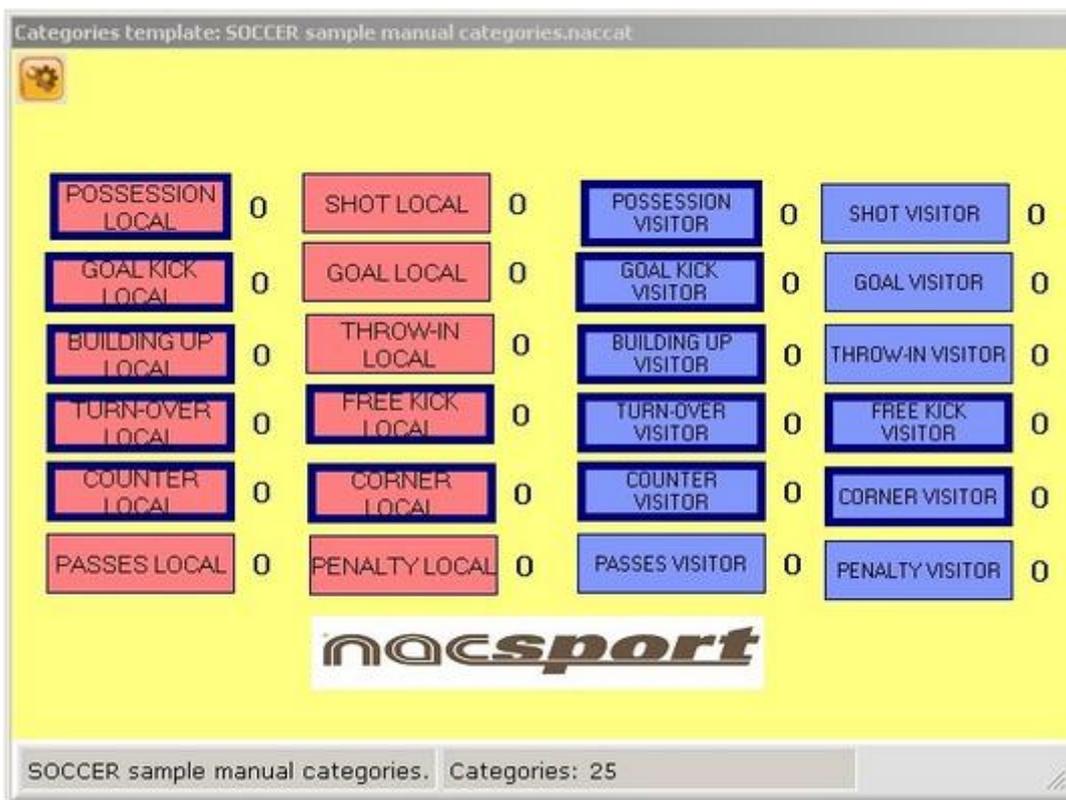

## B) Categories window properties

-  Lock categories template with password.
-  Delete password.

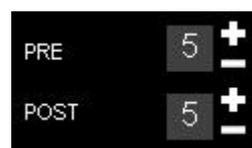

## 3.2 Creating categories templates

### 3.2.1 Categories

Insert categories (buttons) you wish by clicking Or by double clicking the categories template back ground

By default, created categories are automatic (a preset time will be recorded before and after the moment you click on the button), but you will also be able to create manual categories (so you will have to click on the button to start recording and then at the end of the action to stop registering).

To change the preset time of the automatic categories, click

To change automatic categories into manual categories, click  Manual mode .

### 3.2.2 Other options for creating categories templates

#### 3.2.2.1 Graphical options (size, color, pictures, etc.) of the buttons.

To change the place of a button, click and drag it .

To change the order of the button, right click with the mouse on the button and select **Send to the back** or **Send to the front**, with this option, user will be able to bring buttons to front or send them to back as if they were layers.

To change the size of a button, keep pressing the ALT key and drag the lower right corner of the button

To change the color of the button click

To add an image (picture) to a button, click and then click to fit the size of the image to the button.

To change the font and text colour of a button, click .

To undo last change, press Ctrl+Z.

To show/hide a button during action's registering click  Visible button while registering

To use a button as a partial or full frame for the template click on  Make button inactive

From Window Properties tab:

To show/hide the background grid click  Grid reference

To adjust the button to a line of the background grid click  Adjust button to the line

You can change the size of the lines on the background grid by setting a number in the  Size box

To Create templates with predefined Nacsport Tag&go size select **Tag&go dimensions**

### 3.2.2.2 Equalize properties and clone buttons

To equalize properties of buttons (categories or descriptors), choose buttons that you want, click and choose the properties to equalize.

To clone a button (all the properties of the new button will be the same than the original one) choose a button, click and select the amount of buttons you want to create.

### 3.2.2.3 Add hot keys

Select a button and then choose one of the keys in the list shown below.

### 3.2.2.4 Export templates to Nacsport Tag&go

Click and select Export template to Nacsport Tag&go

### 3.2.2.5 Category rating.

With this property you can give a rating (from 1 to 5) to the category you click, this will help you to find in a better way the registered actions once you are in the Timeline.

To use this property follow these steps:

- 1- Select a button and click on the **Activate rating** option in the **behaviour tab**.
- 2- During the register of actions select the rating of each category by clicking on the category and then on the rating that will pop up.

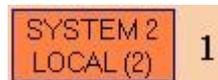

- 3- Once in the Timeline click on and choose the rating which categories you want to show.

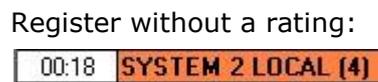

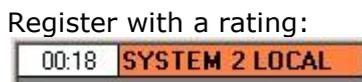

**Note:** You can use the keyboard to add a rating using the number keys from 1 to 5. In the case you are using keyboard shortcut for you categories and they are any number key between 1 and 5 you should activate the "Rating using keyboard (1,2,3,4,5)" property. With this property you can use the keyboard for both, registering actions and adding ratings. Please follow these steps

- 1- Pres the number key (1,2,3,4,5) to register the category with the corresponding shortcut

The category rating will be automatically opened.

- 2- Set the rating you want by pressing the corresponding key (1,2,3,4,5) o close the rating by pressing Esc.

### 3.2.2.6 Groups of buttons

With this property you will be able to make groups of different buttons. To do this click on the tab "Groups", choose the button you want and click on and type the name of the group.

Example:

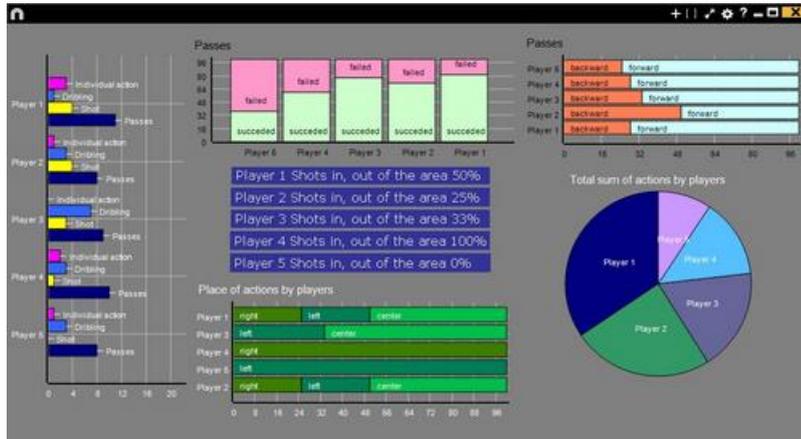

To make a group of player choose the players (John, Bob, James)

click on and type a name for the group . Now those 3 players are part of the same group

### 3.2.2.7 Dashboards

The Dashboards will allow you to see a graphical representation of the actions happened in the event, making easier to understand what happened during the event

### Charts

The charts will allow you to see a graphical representation of the actions happened in the event, making easier to understand what happened during the event

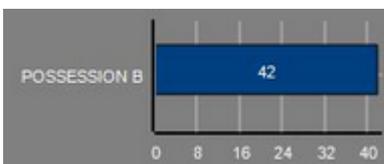

To create a dashboard click on and select "make a new chart"

Choose the kind of chart you want to make and then click on the categories you want to show.

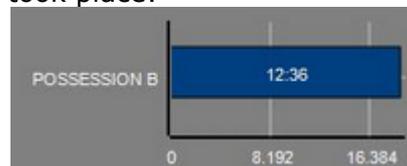

To change the colour of any element in the chart click on it and choose the color you want. To add the same color to all the elements you are adding to the chart click on "Same colour for each series"

To lock any element in the dashboard right click and choose the option you want. To show the amount of time during an action took place instead of the amount of action happened click on  Values in time mode

Amount of actions happened:

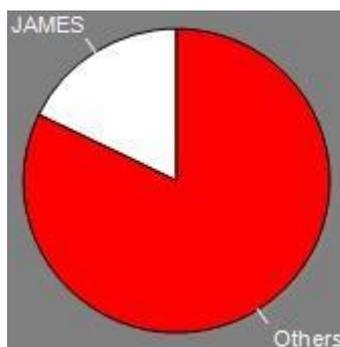

Amount of time during the actions took place:

To create a chart relative to a group select any of the pie or donut charts and click on the categories you want to see, then click on "Relative to a group" and choose the group which contains the categories you selected before. Now the chart show the value of the action selected in relation to the total amount of the group

Example:

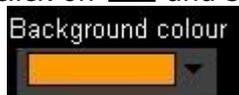

If you select a player relative to a group which contains the total amount of players you can see participation of a player in relation the participation of the rest. To do this select the player you want, select "Relative to a group" and select the group which contains all the players.

### Labels

Labels will able you to see a numerical representation of actions happened in a event, making easier to understand what happened during the event  
You can make 3 different kinds of labels, the simple label, the time label and the data label

To make a simple label click on and set a name for the label, to change the

colour of the label click this label shows only text and can be use to organize the dashboard

To make a time label click on and set a name for the label, to change the

colour of the label click , this label shows a timer which is the time of the actual video .

To make a data label click on and select the categories you want to show.

Example:

To make a label which show the total amount of actions made by a player on the right of the field click on the name of the player and on the descriptor right

Player 1,Right: 41

To change the colour of the label click

To set a nickname for a label type the nickname on the corresponding box and select  Nick name now the label will you the text you set for it

Label without nickname:

Free kick Side Shot Drill In the area = 0

Label with nickname:

Free kick 0

To hide the text of a label and only show the numeric value of it click on

Hide the text

To show the amount of time during an action took place instead of the amount of action happened click on  Values in time mode

Amount of actions happened:

Possession A: 119

Amount of time during the actions took place

Possession A: 35:42

To create a label relative to a group select the categories you want to see, then click on "Relative to a group" and choose the group which contains the categories you selected before. Now the label show the value of the action selected in relation to the total amount of the group as a percentage, to see it as a absolute value click on  Absolute value

Percentage

On target= 20%

Absolute value

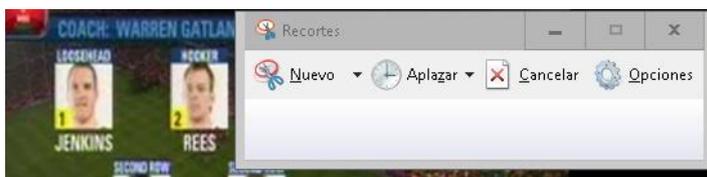

On target= 3/15

To see the labels ID's keep pressing Alt Gr. This will help you making label relative to another label.

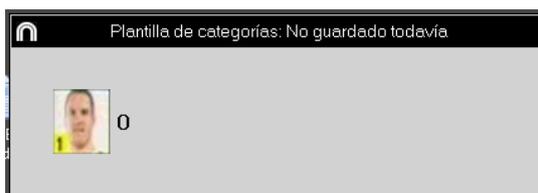

### 3.2.2.8 Make a button using a screen cut.

This tool will allow you to make a button containing an image without needing to adjust the size of the image.

To use this tool you will need to open any screen cut tool, for example the snipping tool which Windows provide by default. Open the image you want to use and snip/screen cut it.

Right click on the template's background an click on "Paste picture and create category"

### 3.2.2.9 Set an image as background

With this option you can use an image a background for your template.

To insert an image click on **Window Properties** and then on finally choose the image you want to use.

## 4. VIEWING AND REGISTERING

---

Now the three options to view and record an event will be explained.

[4.1 Register from file](#)

Page 27

[4.2 Real-Time register](#)

Page 31

## **4.1 Register from file**

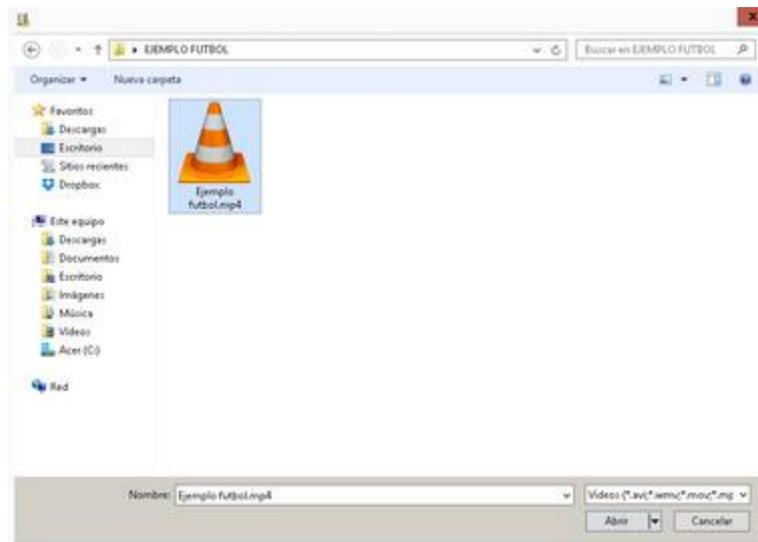

This is the working environment in which a video file is seen and the actions are recorded by a category template created by the user.

Follow the steps below to work with this environment:

**1.- Click on Register from File on main menu.**

**2.- Select the video file you wish to watch and click Open.**

### 3.- Open or create a category template to record the actions of the generated video.

To create a category template, click .

To open a category template, click .

### 4.- To register actions.

Click  or check the option **Register actions**.

Click the video image to play and then click on the categories (buttons) created for that purpose, as they arise.

Click the video to pause the playback.

To order registers History Click  and select **Order registers History by time** or **Order registers History by creation**.

1- Order registers History by time: last action shown will be the last moment of the video registered.

2- Order registers History by creation: last action shown will be the last moment of the video registered in the current actions register.

*Example:*

An analyst is reviewing a game for the second time and then he registers new actions in the middle of that event. With this new tool he will be able to choose how the registers are listed in the register control: whether the last one shown in the list is the last of the event or the last one clicked. The purpose of this feature is so that you can easily check the last registers created regardless of where they appear chronologically in the video.

To draw the image, click . This drawing will be saved in your database.

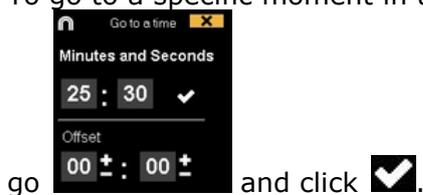

**See shortcuts**

Keep pushing the icon to see the shortcuts of you buttons.

**Resize video window**

Click on and choose the size of the window you want to use. The window size will be determinate by the resolution of the video playing.

To go to a specific moment in the video, click , then select the time you want to

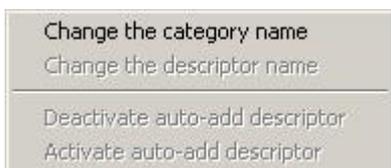

To play a video in slow motion click on and select the speed you want

To quickly modify buttons, right click the button you want and choose what you want to modify on the drop-down menu.

Categories' menu :

To add a note to an already registered category, click right the register which is in the box on the left of the register control window and add a note. By default, notes are equal to category descriptors.

To save the note, click .

To play, compare, classify or change the recorded actions, click  to open the record editing environment (Timeline).

## **4.2 Real-Time register**

This is the environment in which video images can be viewed from an external source (video camera, video converter, etc.) connected to the computer's FireWire port. While a video file is being created (digitized) with external images, users can use a category template to register actions.

In other words, the video and the action registered are created simultaneously. At the end of the event, user will have all the actions in a Timeline, where they can be easily analysed and managed.

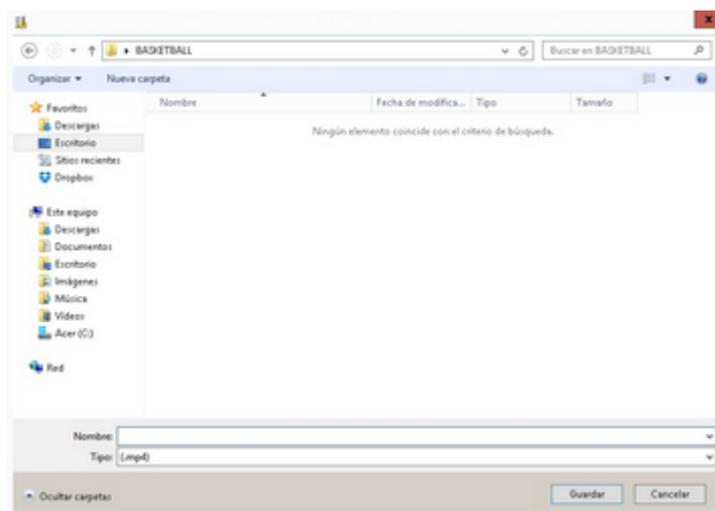

Follow the steps below to work with this environment:

**1.- Connect the camera to the PC**

**2.- Click Real-Time Register on the main menu.**

**3.- Enter the name of the video file to be captured. Then click on Save.**

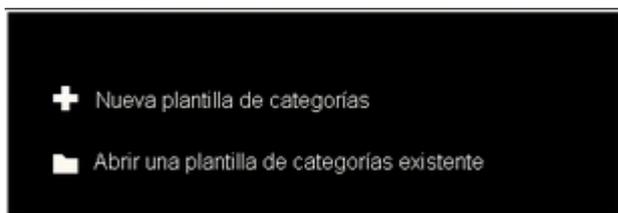

**4.- The video will be in .MP4 format and will be stored with compressed quality.**

You can change the video format from the option menu by clicking  in the register control window.

**5.- Open or create a category template to record the actions of the generated video.**

To create a category template, click .

To open a category template, click .

**6.- To start the video capture, click .**

Then click on the categories (buttons) created for that purpose as they arise.

To pause the video capture click .

To order registers History Click  and select **Order registers History by time** or **Order registers History by creation**.

1- Order registers History by time: last action shown will be the last moment of the video registered.

2- Order registers History by creation: last action shown will be the last moment of the video registered in the current actions register.

Example:

An analyst is reviewing a game for the second time and then he registers new actions in the middle of that event. With this new tool he will be able to choose how the registers are listed in the register control: whether the last one shown in the list is the last of the event or the last one clicked. The purpose of this feature is so that you can easily check the last registers created regardless of where they appear chronologically in the video.

To draw onto the image in the current video, click . This drawing will be saved in your database.

**See shortcuts**

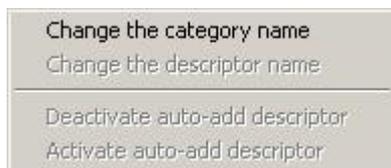

Keep pushing the icon to see the shortcuts of you buttons.

**Resize video window**

Click on and choose the size of the window you want to use. The window size will be determinate by the resolution of the video playing.

To quickly modify buttons, right-button click the button you want and choose what you want to modify on the drop-down menu.

Categories' menu :

To add note to an already registered category, right click in the register in the box on the left of the register control window and add note. By default, notes are equal to the descriptors of the category.

To save the note click .

To play, compare, classify or change the recorded actions, click to open the record editing environment (Timeline).

## 5. TIMELINE

---

This environment contains all the registered action shown by categories (rows) in an intuitive Timeline in which you can modify you register, change its duration, add notes or drawings, etc. You can also make presentations or video to show your registers. Now all the Timeline options will be explained:

[5.1 Timeline icons](#) Page 35

[5.2 Timeline tools](#) Page 36

## **5.1 Timeline icons**

-  Show and hide all records (actions) in selected category.
-  Show the window to make lists of actions (presentations).
-  Show the window to make a video with the selected category or actions.
-  Show the window which generates a sequence of frames of the selected action.
-  Show the window to compare selected actions (8 maximum).
-  Show the 'Viewing and recording actions' environment.
-  Show the window to adjust the length or time interval of the records.
-  Open the window to draw the actual frame of the video.
-  Delete the selected register/s from the Timeline.
-  Timeline options.
-  Open exportation options.
-  Open the dashboards

## **5.2 Timeline tools**

a. <a href="#">Show/hide register list</a>	Page 37
b. <a href="#">Presentations</a>	Page 38
c. <a href="#">Make a video</a>	Page 43
d. <a href="#">Frame maker</a>	Page 45
e. <a href="#">Compare actions</a>	Page 46
f. <a href="#">Synchronize Timeline</a>	Page 47
g. <a href="#">Drawing tool</a>	Page 48
h. <a href="#">Register properties window</a>	Page 49
i. <a href="#">Timeline options</a>	Page 50
j. <a href="#">Export</a>	Page 51
k. <a href="#">Dashboards</a>	Page 52

### 5.2.1 Show/hide register list

This tool shows/hides the list of registers the Timeline contains in a clear and easy way.

Registers can be shown by categories or chronological order.

### 5.2.2 Presentations

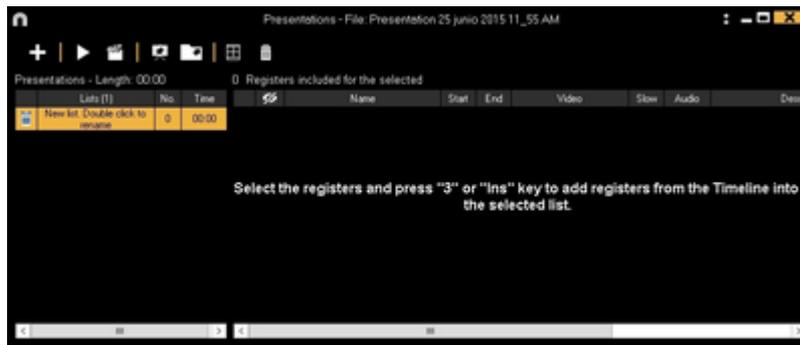

With this tool you can make a list with registers in order to create a presentation and then show them o make a video with them.

#### 5.2.2.1 To make a presentation

To make a presentation, click from the Timeline and then **Make a new presentation.**

Make a new list by clicking . You can change the name of the list by double clicking it.

Select register you want and press the key number **3** to add them to the list.

You can select registers on the left of Timeline.

To delete a list click .

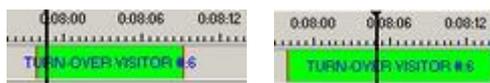

To edit registers from the presentation:

To edit a register from the presentation, double click it or click .

In this window, you can add notes, pictures and drawings. You can also change the duration of the register.

To change the length of a register, click on the start/end of a register and when the icon  turns up, just drag the register to the moment that you want.

To add a drawing, click  at the moment of the video you want to. It will be saved in your database so it will be shown in the presentation.

With these options, you can modify an already added drawing or picture.

You can add a note by typing what you want on the proper text box.

To go to the next register, click .

To edit the presentation:

You can organize the presentation in some different ways:

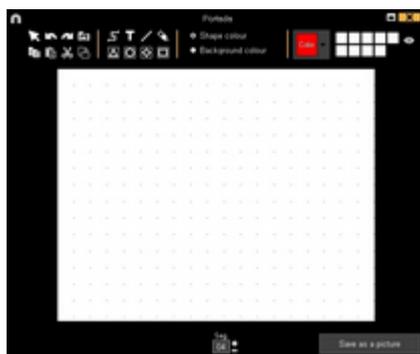

a) Lists: each list contains a kind of action.

Presentations - Length: 05:38			
	Lists	No.	Time
	TURN-OVER LOCAL	14	02:20
	TURN-OVER VISITOR	13	02:08
	SHOT LOCAL	4	00:40
	SHOT VISITOR	3	00:30

b) Using front pages to split between a bunch of actions and another

7	<input checked="" type="checkbox"/>	TURN-OVER LOCAL #12
8	<input checked="" type="checkbox"/>	TURN-OVER LOCAL #13
9	<input checked="" type="checkbox"/>	Shot local
10	<input checked="" type="checkbox"/>	SHOT LOCAL #1
11	<input checked="" type="checkbox"/>	SHOT LOCAL #2
12	<input checked="" type="checkbox"/>	SHOT LOCAL #3
13	<input checked="" type="checkbox"/>	SHOT LOCAL #4
14	<input checked="" type="checkbox"/>	Shot visitor
15	<input checked="" type="checkbox"/>	SHOT VISITOR #1

To create a front page click

Click or to undo/redo the last changes

Click on to see the list of already created front pages, select **creation order** and the front pages will be ordered by creation date (newest or oldest first).

Modify the time while the front pages are shown selecting it on

Import images as front pages into a presentation.

**There are 2 options:**

**A)** Select the image/images you want to import and drag them into the presentation window

**B)** Click on , select import image and then select the image/images you want to import.

**Note:** Each image you import will be added as a new front page in the presentation.

Copy, cut and paste registers in the presentation.

**A)** Select the register you want in a list, right mouse button click and choose copy or cut. Select the list where you want to paste the registers, right mouse

**B)** Select the register you want in a list, drag them into another list to copy them. rag them into another list while keeping pressed the Ctrl key to cut them.

### 5.2.2.2 Show a presentation

To show a presentation, click .

In this window, the presentation that you choose will be shown.

To reproduce a register after another with stopping the video, click

You can show the previous or next register by clicking   or by pressing keys **1** and **2**.

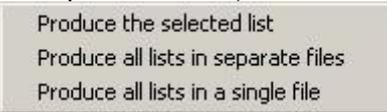

To show the video on full screen, click .

To play a video in slow motion click on  and select the speed you want

### 5.2.2.3 To produce a presentation

To produce a video with the selected presentation, click  and select one of the

options in the drop-down menu .

To add a transition between 2 registers in your presentation click on  then on "Add video transition" and select the transition you want.

**Note:** Video transition will only be shown on the final video. It will NOT be shown when showing a presentation from the software

You can select the output video format in the video production window.

Click  to start the production.

Type the name of the file that will be produced and click on **Save**.

### 5.2.3 Make a video

With this tool you can make a video with the selected registers.

1-To make a video select the register you want in it and then click

2- Select output format and quality you want and click

By clicking , a drop-down menu will appear showing more options for video quality.

To show notes in the video, click and choose the option you want.

To add audio to the video click **Process audio** and choose the option you want.

To add a logo to the final video click on  from the video making window and then click on .

Add the logo you want by clicking on  and looking for the file and select the place on which the logo will be

**Note:** The recommended size for the logo will depend on the final video's resolution.

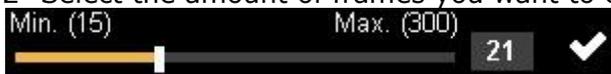

3- Type the name on the file you are going to produce a click on **Save.**

### **5.2.4 Frame maker**

With this tool you can split a video into separate images.

1- Select a register and click on .

2- Select the amount of frames you want to extract from the video

Click  to draw in current frame.

Click  to save the actual image as a .jpg file.

Click  to save all images as .jpg files.

Click  to play all the images.

Click  to produce a video with all the extracted images.

### **5.2.5 Compare actions**

With this tool you can compare up to 8 different videos (registers).

1- To compare registers just select them in the grid on the left of Timeline by keeping pressed Control key and clicking .

You can draw by clicking on .

To synchronize the beginning of one of the videos, click  until the moment you desire. Then, repeat the process with other videos.

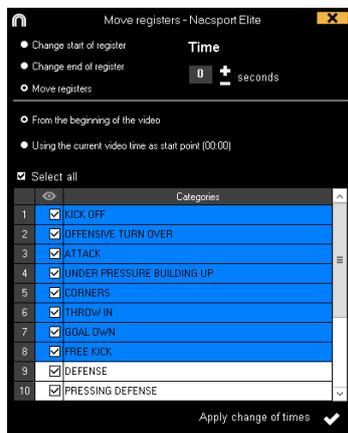

To play all the videos at the same time, click  and .

To see the videos on full screen, click .

## 5.2.6 Synchronize Timeline

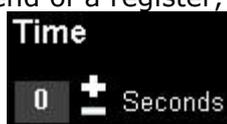

With this tool you can modify the time of you registers in an quick and easy way. This is useful for situation when the video is wrong synchronized so the registers do not show actions properly.

To open the tool, click .

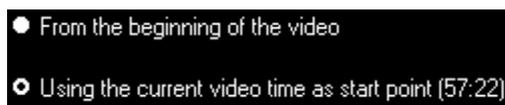

Look in the list for the categories you want to move and chose what you want to modify (beginning or end of a register, or moving the time of a register) and then

select how much time  in positive to move to the right in negative to move to the left.

You can choose to move the registers from the beginning of the video or from the actual moment of it. This way you can synchronize just the registers from the 2<sup>o</sup> half for example.

Click on  to make the changes.

### 5.2.7 Drawing tool

With this tool you can add a draw onto an exact moment of the video.

To make a draw click

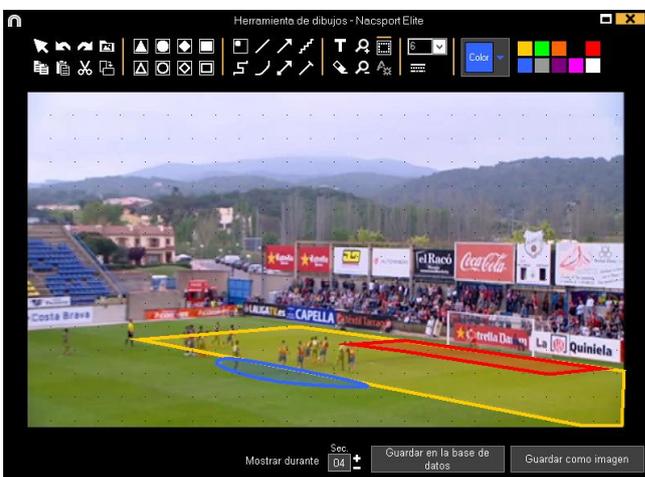

To undo or redo a draw click or respectively.

To change the font, color and background of a text click on

To add a reference grid in order to make a draw click on

To break a form click on

To save the draw as a .jpg file click

If you want your drawing to appear in presentation and videos, click **Save in the database**. Drawing will be shown for 5 seconds by default.

### **5.2.8 Register properties window**

In this window, you can modify timing and drawing of your registers, but also add notes and descriptors.

To open the registers' properties window, click  or double click a register.

To modify a drawing, click .

To add a picture to the register, click on .

You can add a note by typing what you want on the proper text box.

To modify the time of the register, drag the beginning or the end of the register to the moment you want.

To go to the next register click . To go to the previous register, click .

### 5.2.9 Timeline options

**Zoom** : you can maximise or minimise the Timeline. To show the entire Timeline, click .

**Change the start or end of a record:** position the cursor on the left (start) or right (end) of the record and when it changes to . Left click and drag it in one of the two possible directions.

**Temporary displacement of record** (without affecting its length): place the cursor in the centre of the record and when it changes to . Left click and drag it in one of the two possible directions.

**Add category:** Right click the name of a category (row) and select **Add row**. Then enter a name and click on **Ok**. Timeline can have a maximum of 50 categories or rows (depending on the number of categories previously created in the buttons template).

**Edit category name** (row): Double click on the name of the category in the timeline. Type the new name in the text box and click on  to save the change. Pressing the Enter key will save the changes and automatically go to edit the next category.

**Delete category** (row): Right click the name of the category to be deleted. Select **Delete row** and click **Yes**.

**Duplicate category** (row): Right click the name of the category to be duplicated and select **Duplicate row**.

**Order the Timeline:** Right button click on any category and choose "Order the Timeline by...". You can order the Timeline by colour, name, number of registers or customized.

**Make a new register in a category:** select the category in which the register will be made, place the vertical position marker at the moment you want, right button click on the selected category and click **Make a new register in this category** or press the "C" key.

**Show/hide a category:** Select the category you want and click the **Hide category** or **Show category** option.

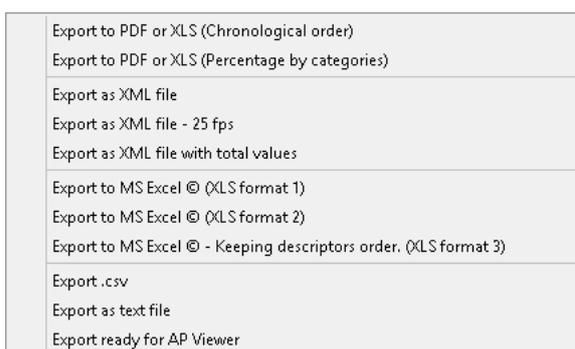

**Show/hide total sum of registers:** Right button click on the Timeline and select the **Show/hide total sum of registers**

### **5.2.10 Export**

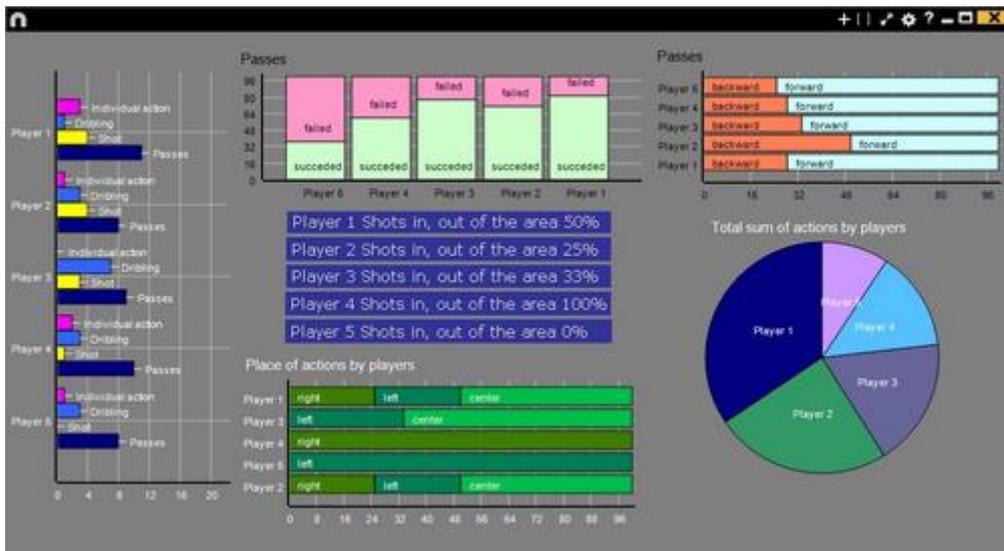

With this tool you can export you database in some different ways:

- As .XLS file showing the registers in chronological order.
- As .XLS file showing the percentage of categories.
- As .XML file in order to work with other programs.
- As .XLS file.

To export, click  and select desired option

### 5.2.11 Dashboards

The Dashboards will allow you to see a graphical representation of the actions happened in the event, making easier to understand what happened during the event

#### 5.2.1.1 Make a dashboard

You will have 2 ways to show your information on your dashboard.

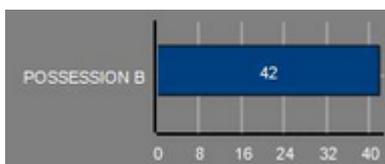

##### 1. Charts

To create a dashboard click on and select "make a new chart" . Choose the kind of chart you want to make and then click on the categories you want to show.

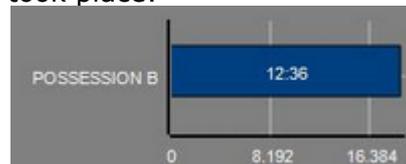

To change the colour of any element in the chart click on it and choose the color you want. To add the same color to all the elements you are adding to the chart click on "Same colour for each series"

To lock any element in the dashboard right click and choose the option you want. To show the amount of time during an action took place instead of the amount of action happened click on  Values in time mode

Amount of actions happened:

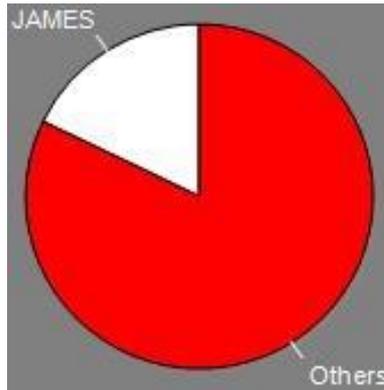

Amount of time during the actions took place:

To create a chart relative to a group select any of the pie or donut charts and click on the categories you want to see, then click on "Relative to a group" and choose the group which contains the categories you selected before. Now the chart show the value of the action selected in relation to the total amount of the group

Example:

If you select a player relative to a group which contains the total amount of player you can see participation of a player in relation the participation of the rest. To do this select the player you want, select "Relative to a group" and select the group which contains all the players.

## 2. Labels

Labels will able you to see a numerical representation of actions happened in a event, making easier to understand what happened during the event

You can make 3 different kinds of labels, the simple label, the time label and the data label

To make a simple label click on  and set a name for the label, to change the

colour of the label click  this label shows only text and can be use to organize the dashboard

To make a time label click on  and set a name for the label, to change the

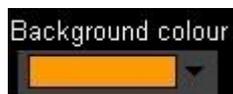

colour of the label click , this label shows a timer which is the time of the actual video .

To make a time label click on  and select the categories you want to show.

Example:

To make a label which show the total amount of actions made by a player on the right of the field click on the name of the player and on the descriptor right

Player 1,Right: 41

To change the colour of the label click

To set a nickname for a label type the nickname on the corresponding box and select  Nick name now the label will you the text you set for it

Label without nickname:

Free kick Side Shot Drill In the area = 0

Label with nickname:

Free kick 0

To hide the text of a label and only show the numeric value of it click on

Hide the text

To show the amount of time during an action took place instead of the amount of action happened click on  Values in time mode

Amount of actions happened:

took place: Possession A: 119

Amount of time during the actions

Possession A: 35:42

To create a label relative to a group select the categories you want to see, then click on "Relative to a group" and choose the group which contains the categories you selected before. Now the label show the value of the action selected in relation to the total amount of the group as a percentage, to see it as a absolute value click on  Absolute value

Percentage

On target= 20%

Absolute value

On target= 3/15

To see the labels ID's keep pressing Alt Gr. This will help you making label relative to another label.

## 6. MY ANALYSIS

In this environment you can consult all the databases created or imported by the user.

To access to presentation, timeline or registering environment, double click the name of any green database you want and choose what you want to do.

If the databases is shown in red colour, this means that there is no video linked to that database due it is in a different place, it was deleted or it has another name. If the video was not deleted, you can link it with by double clicking the name of the database a looking for the video.

You can also:

Make subfolders: Click any folder and then click .

Delete folders (and the databases in it) or delete databases: Click any folder (or database) and then click .

Assign a favorite folder: Click any folder you want and then click .

Choose folders' path: Click  and then select the path.

Open several databases at the same time: Choose the databases you want and click **open selected databases** these databases will be opened at once in the Timeline

Open databases folder: Click  icon.

Auto-link lost videos: With this option you can quickly link videos to your analysis in case you moved them to any other folder.

To do so right click on any analysis with a non linked video. Select the "auto-link" option and search the folder where the video is. The software will automatically search for any coincidence in that folder and it will link the videos to their corresponding analysis

**Note:** This option will look in to the path folder by folder. This means that in case of searching in the whole unit C: the software will look in the whole hard drive (this process can take a long time)

## 7. TOOLS

---

<a href="#">7.1 Merge and convert video files</a>	Page 58
<a href="#">7.2 Import/Export .XML Files</a>	Page 59
<a href="#">7.3 Import databases from Tag&amp;Go</a>	Page 60
<a href="#">7.4 Quick merge videos from same source</a>	Page 61

## 7.1 Merge and convert video files

With this tool you can convert multiple video files into one video file in .AVI format. Input formats supported by Nacsport are: .AVI, .WMV, .MOV, .MPEG, .MPG, .MOD, .M2V, .MTS, .M2TS, .VOB, .MP4 and .AVS.

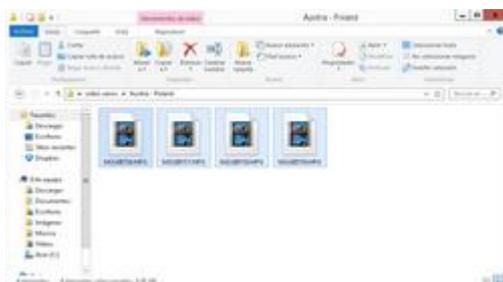

To use this tool, follow these steps:

- 1- In the Nacsport main menu, click on **Tools**.
- 2- Click on **Convert MPEG-2 to .AVI**.

- 3- Click .

- 4- Select the video(s) you want to convert to .AVI and click on **Open**.

- 5- Click .

- 6- Enter a name and select a location for the video that will be generated.

## **7.2 Import/Export .XML Files**

\* To **import a .XML folder**:

- a) At the main menu of the program, click on **Tools**.
- b) Select **Import**.
- c) Select **Import .XML of Gamebraker and SportsCode**.
- d) Click .
- e) Look for the .XML folder and double click it.
- f) Select name and destination for the **.NAC Database** and click on **Save**.
- g) In the section 3, click .
- h) Select the video which you want to link with the **.NAC Database** and double click it.
- i) Click on **Open the Timeline**.

\* To **export a .XML folder**:

- a) Once the Timeline is opened with the folder to export, click .
- b) Select **Export .XML**.
- c) Select name and destination. Then, click **Save**.

## **7.3 Import databases from Tag&Go**

In Main Menu, in the tools section, select **Import/Import from Tag&go**

Click  and select database to import.

## 7.4- Quick merge videos from same source

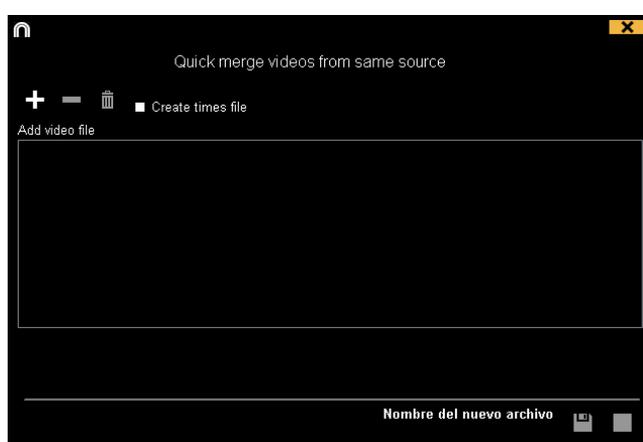

With this tool you can convert multiple video files into one video file in the same format of the original videos.

**Example:** Files from a video camera which makes several files from a single match. This merge is only valid for files of the same source

Input formats supported by Nacsport are: .AVI, .WMV, .MOV, .MPEG, .MPG, .MOD, .M2V, .MTS, .M2TS, .VOB, .MP4 and .AVS.

To use this tool, follow these steps:

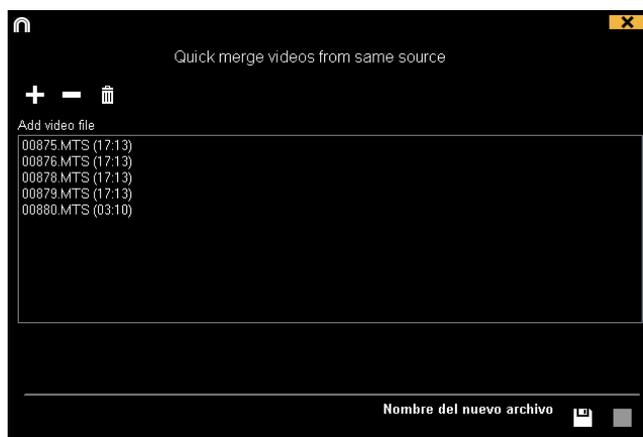

- 1- In the Nacsport main menu, click on **Tools**.
- 2- Click on **Quick merge videos from same source**

- 3- Click on .

- 4- Select the video(s) you want to merge and click on **Open**.

- 5- Click on .

- 6- Enter a name and select a location for the video that will be generated

## 8. ANNEX

---

[8.1 Import and export databases](#)

Page 63

[8.2 General options](#)

Page 64

[8.3 Update 2.3.5](#)

Page 65

## **8.1 Import and export databases**

Import and export Nacsport databases is as easy as copy the database you want and paste it in another PC.

### **Export:**

You can use 2 different methods:

#### **1.- From My documents folder**

- 1- Go to **My documents** folder.
- 2- Open **NAC SPORT DATA** folder
- 3- Open **Databases Nac** folder
- 4- Copy the .NAC files you want from this folder

#### **2.- From Nacsport databases**

- 1- From Nacsport main menu click **My analysis.**
- 2- Select the database you want to export.
- 3- Right click the database and click **Copy.**

### **Import:**

You can use 2 different methods:

#### **1.- From My documents folder**

- 1- Go to **My documents** folder.
- 2- Open **NAC SPORT DATA** folder.
- 3- Open **Databases Nac** folder.
- 4- Paste .NAC files you want from this folder.

#### **2.- From Nacsport databases**

- 1- From Nacsport main menu, click **My analysis.**
- 2- Right click any folder and click **Paste to import** an already copied file.

## **8.2 General options**

### **8.2.1 Show video player time.**

Now you can choose between 4 different ways to show the video player time. To do so go to the main menu and click on the tools tab. Click on "Options" and then on "Video player" finally select the option you want.

## 8.3 Update 2.3.5

### 1. TIMELINE

#### 1.1 Double click to rename categories

To quickly change the name of a category double click on it in the timeline. Type the new name in the text box and click on  to save the change. Pressing the Enter key will save the changes and automatically go to edit the next category.

#### 1.2 Improvements in the drawing tool (text)

With these new option you can change the Font of the text by clicking on . To set a solid color as a background for the text select it on  Color de fondo

#### 1.3 Synchronized selected categories.

To adjust the time of several categories at the same time click on  and select the categories you want to modify. The next change to do will only affect the selected categories

#### 1.4 Make a video with a Logo

To add a logo to the final video click on  from the video making window and then click on 

Add the logo you want by clicking on  and looking for the file and select the place on which the logo will be

**Note:** The recommended size for the logo will depend on the final video's resolution.

## 1.5 Make a video with transitions

To add a transition between 2 registers in your presentation click on  then on "Add video transition" and select the transition you want.

**Note:** Video transition will only be shown on the final video. It will NOT be shown when showing a presentation from the software

## 2. GENERAL CHANGES

### 2.1 Show video player time.

Now you can choose between 4 different ways to show the video player time. To do so go to the main menu and click on the tools tab. Click on "Options" and then on "Video player" finally select the option you want.
